

To Whom it may concern;

I would like to make time to express my thanks to the staff of The CARE Center. The CARE Center has provided services throughout the community and helped so many families. They also provide help with financial aid in emergency situations. For instance, I was in need of help and did not have funds to take care of my needs. The CARE Center provided an interest free loan to solve my problem. They allowed me to make installments to repay my loan, as I was financially able. This loan was critical to me because I had just started a new job and if I had not received the loan I may not have been able to keep my job. As everyone knows, it sometimes takes two or three weeks to receive the first paycheck and after a series of unexpected events I was broke. By taking this interest free loan I was able to get off on the right foot with my new employer and in a dignifying manner. I am proud to have paid back the loan in full. I hope by fulfilling my obligation, others will be helped as well. It is better to give than to receive.
