

The CARE Center, through NHCLC (New Hope Community Learning Center, a partnership between The CARE Center and New Hope Schools), has had the opportunity to impact and make a difference for so many local children. These children are the future of this community. They're learning they have the ability to go further in life than what they may have thought possible and that their dreams can become a reality. They're also learning that there are people in the world that truly care what happens to them. The CARE Center is changing our town, today. If it didn't exist, there would be no change for our town or the children who are looking forward to all of their tomorrows.
